

# Alkalium

food supplement with sweetener

sachets

**Alkalium** is a food supplement designed to maintain the urinary tract health. The product contributes to the improvement of excretory function and has beneficial effects on the hydroelectrolytic balance.

Over time, due to an inadequate diet that alters the electrolyte balance, a predisposition, or in patients with catheters, especially for long periods of time (JJ stent), the risk of the insoluble salts formation in the urine is increased.

**Solidago virgaurea extract** maintains optimal urinary tract function. *Solidago virgaurea* is a source of bioflavonoids beneficial to kidney health that contributes to the process of urine formation and elimination (diuresis). By diuresis, salts that can settle in the urine are also eliminated.

**Magnesium** helps to ensure a beneficial effect of the hydroelectrolytic balance by balancing the magnesium/calcium ratio, in favor of magnesium, thus preventing the excess elimination of calcium in the urine and its deposition in the form of sediments.

**Vitamin B<sub>6</sub>** helps to increase the absorption of magnesium, improves its activity and maintains its optimal level 6 in cells. Vitamin B ensures the normal metabolism of cysteine, which, in excess, is involved in the formation of 6 kidney stones.

**Ingredients:** potassium citrate, acidity corrector (citric acid), magnesium citrate, *Solidago virgaurea* extract, vanilla flavor, anti-caking agent (silicon dioxide), sweetener (sucralose) and pyridoxine hydrochloride.

Active ingredients	Quantity/sachet	%RDI/NRV*
<i>Solidago virgaurea</i> extract	500 mg	-
Potassium	780 mg	39
Magnesium	132 mg	35
Vitamin B <sub>6</sub>	25 mg	1786

\*The Nutritional Reference Value according to Reg. 1196/2011

**Alkalium** is a food supplement and does not replace any therapy, nor does it replace a varied and balanced diet and a healthy lifestyle.

#### Mode of administration:

1 sachet per day is recommended as a single administration or divided into two administrations per day.

The content of each sachet is dissolved in 200 ml of water. It is recommended to administer the product during or 30 minutes after the meal.

Sucralose is a zero-calorie sweetener and can be safely administered in diabetic patients.

#### Warnings:

It is not recommended in people with hypersensitivity to any of the ingredients.

It is not recommended for use in patients with conditions that predispose to hyperkalemia (chronic heart failure or kidney failure, uncontrolled diabetes). Caution is advised in patients with hyperkalemia. Normal potassium values vary between 3.5 and 5.0 mEq/L. Periodic testing of blood potassium values is recommended for patients using **Alkalium**, when there is a risk of developing hyperkalemia. The safety of the product during pregnancy or in children under 12 years of age has not been established. **Alkalium** is administered in pregnant women and children under 12 years of age only if recommended by a specialist.

**Interactions:** Alkalium administration concomitant with potassium-sparing diuretics is not recommended.

# URACTIV®

## FULL RANGE OF PRODUCTS FOR THE HEALTH OF THE UROGENITAL TRACT

### KIDNEY AND BLADDER HEALTH

**URACTIV® FORTE**  
Concentrated and effective formula, indicated from the onset of the first signs of urinary discomfort.

**URACTIV® capsules**  
Recommended from the onset of the first signs of urinary discomfort: pain, frequent urination, rash.

**URACTIV® Mami**  
Contains standardized natural active ingredients with a high safety profile during pregnancy and breastfeeding.

**URACTIV® Control**  
Reduces the involuntary loss of urine and the frequency of the nighttime urination.

**URACTIV® D-mannose**  
Promotes diuresis and contributes to maintaining the health of the urinary tract.

### RAPID DIAGNOSIS

**URACTIV® TEST**  
Simple and rapid test, easy to use at home. Detects urinary infection in 30 seconds.

### PROSTATE HEALTH

**URACTIV® Man**  
Contributes to maintaining the health of the prostate and reducing the frequency of nighttime urination.

### URINARY CALCULI

**URACTIV® Litho**  
Complex formula that combines the extract of *Phyllanthus niruri*, acknowledged for its effect of dissolving the stones, with magnesium and vitamin B<sub>6</sub>, which have antispasmodic action.

**URACTIV® ALKASOLV®**  
Ensures a significant additional intake of vitamin B<sub>6</sub>, magnesium citrate and potassium citrate in the form of a liquid solution, with beneficial effect on the fluid and electrolyte balance.

**ACIDURIN**  
Helps maintaining the health of the urinary tract in people prone to the formation of struvite and/or brushite stones.

**ALKASOLV® TEST**  
Test strips with high urine pH sensitivity.
