

# URACTIV® DRINK

food supplement with sweeteners

URACTIV® maintains the health of the urinary tract, improves the excretory function of the kidneys and contributes through diuretic action to the clearance from the body of harmful substances, toxic products, foreign or excessive substances, resulted from metabolic processes.

**For the health of the urinary tract we created URACTIV® line**

URACTIV® DRINK contains the optimal concentration of active substances which contributes to the health of urinary tract and supports the excretory function of the kidneys.

**Ingredients:** sweetener (fructose), acidity regulator (citric acid, sodium citrate), bearberry extract, couch grass extract, coloring agent (beta-carotene), star anise essential oil, peppermint essential oil sweetener (aspartame).

**Energetic value:** 15,56 kcal/sachet.

Active Ingredients	Amount/sachet
Bearberry leaves dry hydro-alcoholic extract ( <i>Arctostaphylos uva-ursi</i> ) standardized in arbutin	350 mg
Couch grass rhizomes dry hydro-alcoholic extract ( <i>Agropyron repens</i> )	200 mg
Essential oil purified from star anise fruit ( <i>Illicium verum</i> )	2 mg
Peppermint essential oil ( <i>Mentha piperita</i> )	2 mg

#### Pharmacological properties:

Obtained through a special technological procedure, *Arctostaphylos uva-ursi* (Bearberry) ensures a high level of active substances: arbutin (minimum 20%), ursolic acid, tannic acid, gallic acid, essential oils and resins, hydroquinone, tannins (up to 15%), phenolic glycosides and flavonoids, that have beneficial effect upon urinary tract.

*Agropyron repens* (couch grass) contains agropyrene which has depurative, tonic and remineralizing properties.

The essential oils of mint and star anise potentiate the action of **bearberry leaves extract** and **couch grass extract**.

The complex composition gives **URACTIV® DRINK** remarkable properties, helping to remove water from the body by increasing the urinary flow and relieving discomfort that accompanies urinary disorders.

#### Dosage and administration

- **children over 12 years:** 1 sachet twice daily;
- **adults:** 1 sachet three times daily.

URACTIV® DRINK is administered before meals. The content of each sachet is dissolved in approximately 150-200 ml of tap water at room temperature.

URACTIV® DRINK should be administrated from the first signs of urinary infections (pain, frequent urination, irritation) until their disappearance, but not more than 14 days.

#### Precautions

URACTIV® DRINK is not recommended to persons with hypersensitivity to any of the ingredients. In the absence of safety data on the use during pregnancy and lactation, the product is not recommended during these periods.

It is advisable not to repeat the administration of the product for more than 5 times per year.

URACTIV® DRINK is contraindicated in irritable gastrointestinal disorders and kidney disorders.

URACTIV® DRINK may interfere with products that determine the acidification of urine when administered concomitantly.

URACTIV® DRINK should be administered 1-2 hours before or after the ingestion of iron based preparations.

Contains a source of phenylalanine.

ATTENTION: During treatment, urine may turn brown due to arbutin metabolism products.

Certificate of notification Series/ No.: AD 3364/11.07.2022 CRSP Iași

It is recommended to use the URACTIV® DRINK together with URACTIV® Sensitive intimate gel, a formula specially developed for the care of the external genital region.

URACTIV® Sensitive intimate gel gently cleanses, soothes rash and removes the discomfort from the intimate area.
